

Environmental Statement

Our Commitment

At Business Interiors we have made a conscious decision to live and work in the beautiful South West because we value quality of life and environment above all else. These values are shared with the majority of our clients in the region.

Increasingly we are asked to consider issues such as recycling, sustainability and energy efficiency, whilst legislation becomes stricter. We will respond to these demands and set standards.

We undertake to make a significant commitment to the protection and enhancement of the environment within which we operate. We will take the opportunity to make a real and positive impact on our day to day lives.

Our Policy:

Business Interiors specialises in the design, fit-out and furnishing of offices throughout the South West and beyond. It is the policy of Business Interiors to develop, operate and maintain our operations with due regard to the environment.

We will comply with all applicable legal and other requirements, and will integrate environmental management throughout the business.

We will strive to continually improve our environmental performance and meet the following objectives:

- Enhance the working environment for our staff and clients.
- Be a good neighbour and minimise noise pollution.
- Identify and eliminate the threat of any contamination to the environment.
- Where a pollution threat cannot be eliminated, monitor and control the situation.
- Minimise the use of utilities and materials, promoting the use of recycled materials.
- Minimise waste and ensure materials are reused or recycled where practicable.
- Utilise sustainable materials and technologies where possible.
- Encourage designers and clients to build more sustainable solutions.
- Include selection criteria for our suppliers based on environmental performance.
- To work towards and maintain an environmental management system within the international standard ISO 14001.
